

Introducing
TriVibamins

**TriVibamins
Vibrational
Nutrient
Tabs**

*Because Your
Energy, Vitality
& Good Health
Depend Upon
The Light Particles
You Absorb*

Ingredients Vibrating From *the TriVibamins*

14 Seaweeds
including Kelp and Ascophyllum

Vitamins
A, most Bs, C, D, E & K - All Natural

Minerals
All Basic and Essential Minerals - All Natural and from
the Ocean

Special Supplements
Hyaluronic Acid & Chromium Picolinate

Vegetable & Food Extracts
including Kyolic Garlic, Maca, Aloe Vera, Agaricus &
Reishi Mushrooms, Super Greens, Noni, Soy Sprouts,
Chinese Blood Herbs, Super Algae, Grape Seed

Nutrients
Black Strap Molasses, White Powder Gold,
CoEnzyme Q1 & CoEnzyme Q10, Lecithin

Additional Supplements
Bromelain, D Acetyl L-Cysteine, Beta-Carotene, Cur-
cumin (Turmeric) with Black Pepper, High Quality
Pinot Wine Grown in Central France

Vibrational

Safe & Energizing

Cost Effective

Convenient

Testimonial Letter

“Awesome is all I can say about your *TriVibamins*. To give you some background, I will be 52 years old in August of 2005. I have studied nutrition and applied what I know for over 30 years, so I am in very good health. No one I meet believes that I am as old as my actual age; they usually think I am at least 10 years younger. My physical problems come from severe injuries that I have experienced playing sports.

35 years ago, I had to have surgery on my left knee following a martial arts accident. Since that time I had several re-injuries snowboarding and one major re-injury from roller blade exercises. About 10 years ago, at age 42, I started mountain biking but wound up falling several times and injuring both of my shoulders rather severely.

I want you to know and any you share this testimonial with that I have also studied structured water and I know your Triple Vortex technology works in amazing ways. However, I also know the power of the mind and I wanted to experience as little placebo effect as possible with your outstanding *TriVibamins*. I did my best not have any specific or big expectation that anything would occur. I was pleasantly surprised.

I was very aware of the usual pain/discomfort in my knee coming up the stairs after going to the mail box. I put on the *TriVibamins* at about at 6 PM on Friday and then I even did a moderate medicine ball workout with my legs. Two hours later when I went out and then came back up the stairs, the original discomfort/pain that I usually feel in my knees was 75% gone.

Saturday morning the pain/discomfort was about 90% less than it was originally. Saturday night it was 95% less than originally. And today, Sunday morning (36 hours after wearing them), the pain/discomfort in my knee is 98-99% gone. I am amazed. I really have to focus hard to find any trace of discomfort.

This morning, 36 hours after putting on the *TriVibamins*, when I took off my shirt, I felt no pain in my shoulder. Again, I am blown away at the results I am experiencing with your product.

I have worn the *TriVibamins* round the clock since getting them. I found myself very energized and had a bit of trouble sleeping I was so energized, but I didn't wake tired. Today, 36 hours after putting them on, I have an overall sense of wellbeing that I am associating with the *TriVibamins*.”

- Con Mckinnon

Can the cells of your body absorb the proper amount of nutrition with a technology that intensifies the emission of the light particles in vitamins, minerals and nutrients? Can the light particles of vortex intensified vitamins, minerals and nutrients be properly absorbed by your cells when the vitamins, minerals and nutrients are placed near or on the *skin* of your body? Read on to absorb the possibilities.

Does the human cell absorb high doses of vitamins, minerals and nutrients when taken orally in the forms of natural foods or pills, powders, gels or liquids? **No.** The human cell absorbs only minimal amounts of LIGHT PARTICLES emitting from vitamins, minerals and nutrients. Why? Scientists discovered in the late 1990s that each cell of your body is covered with a sheath of the chemical element called Phosphorous.

Phosphorous absorbs, transforms and emits light particles and therefore the cells of your body have the ability of phosphorescence. When nutrients are processed in the digestive system and the liver, the compositions of the vitamins and minerals are broken down into very basic structures. The basic structures of the vitamins and minerals are emitting light particles.

Light Particle Gatekeepers

The Phosphorous sheaths covering your cells function as light particle gatekeepers or regulators and only absorb the light particles emitting from the basic structures of the vitamins, minerals and nutrients. Your cells will only absorb the light particles of the chemical elements needed by the cells and all other light particles must be eliminated or removed from your body.

The vitamins, minerals and nutrients in whole and raw foods break down into basic structures that emit proper light particles that are absorbed at maximum levels into your cells. The fibers and materials not absorbed by your cells are easily eliminated and removed from your body with proper water hydration.

Vitamins, minerals and nutrients in pill, powder, gel and liquid forms that have been separated from whole and raw foods and ingested into the stomach and liver make inferior basic structures that emit improper light particles that are absorbed at mini-

um levels into your cells. Vitamin C in an orange fruit is absorbed by your cells at a maximum level. Vitamin C in a pill, powder or liquid form absorbs into your cells at a minimal level because your digestive system interprets the isolated and unnatural Vitamin C as a foreign and unknown substance. The materials in a Vitamin C pill or any other vitamin or mineral pill, powder, gel or liquid not absorbed into your cells are eliminated and removed with great difficulty from your body even with proper water hydration.

But what if the molecules of the chemical elements in a Vitamin C pill are vortex intensified in a very natural manner so the light particles are absorbed into your cells at a maximum level without you orally consuming the Vitamin C pill or any other vitamin, mineral or nutrient?

The light particles of the vortex intensified vitamins, minerals and nutrients would bypass the digestive system and not cause stress on the excretion systems while being eliminated from your body. Would you be interested in receiving proper and regulated light particles of vitamins, minerals and nutrients in pill, powder, gel or liquid forms with maximum absorption at tremendous cost savings and no stress on your body?

Introducing Vibrational Nutrition

Vitamins, minerals and nutrients placed in the *Triple Vortex Treatment Chamber* have much different smell and taste from identical items not treated by the *Triple Vortex Chamber*. The improved smell and taste of the treated vitamins, minerals and nutrients are an indication that the molecules are moving in a coherent manner. Previous to treatment by the *Triple Vortex Chamber*, the molecules of the vitamins, mineral and nutrients were in chaos therefore they had a strong and pungent odor and taste.

Proof Is In the Testing

When vitamins, minerals and nutrients treated by the *Triple Vortex Chamber* are placed adjacent to a glass of distilled water for 20 minutes to two hours, the taste of the water has a tangy texture as compared to the very smooth tasting distilled water treated by a normal *Triple Vortex Product*. The tangy taste is caused by the light particles of the vitamins, minerals and nutrients being held by the distilled water.

However, and most importantly, the tangy texture taste dissipates from the distilled water over a period of two hours because there are no Phosphorous molecules in

the distilled water to absorb the light particles emitted from the vitamins, minerals and nutrients treated by the *Triple Vortex Chamber*.

The treated vitamins, minerals and nutrients are placed into a one inch diameter Graphite Tab that has also been treated by the *Triple Vortex Chamber*. The chemical element of Carbon in the treated Graphite absorbs and transmits all of the light particles in the treated vitamins, minerals and nutrients. The sealed Graphite *TriVibamins* are applied to the body in numerous ways. The most effective manner of applying the *TriVibamins* is by placing one tab on left wrist area and one tab on the right ankle area. The tabs can be glued to cloth bands, snap bands or metal jewelry or simply paper taped to the left wrist and right ankle.

The *TriVibamins* that contain miniscule yet very potent and proper amounts of vitamins, minerals and nutrients do not have to be placed directly on the body to work but must be placed no more than one inch from the skin to be effective. The *TriVibamins* are effective for a minimum of *five years*.

The totally safe and effective *TriVibamins* can be attached to cloth wrist bands, elastic bands and metal and beaded jewelry. Or the *TriVibamins* can be simply attached to the wrist, ankle, and chest or throat area by paper tape. The *TriVibamins* can be worn 24 hours a day and seven days a week because the light particles not absorbed by your cells will simply dissipate from your body over a two hour period. However, the minimum application to the body for maximum absorption of the light particle nutrients is two hours when placed on the wrist and ankle and four hours when one tab is placed on the chest or throat area.

The light particles emitted by the *TriVibamins* are guided and distributed throughout the electromagnetic fields of your body. Any cell in your body can absorb the light particles emitted from the *TriVibamins* that are held by the liquids in your body or being guided and distributed by the electromagnetic fields of your body. Again, the Phosphorous sheaths surrounding the cells of your body will only allow in miniscule amounts of light particles in the vitamins, minerals and nutrients that are essential and needed by the cells to function properly.
